Description

Article: cam-controlled multi-spindle automatic lathe
 Manufacturer: Gildemeister
 Type: GM16-6
 Yob: 1991
 six main spindles
 for bars up to D=16mm

This is not a current, regular GM16. 6 pieces of this series have been manufactured. Most parts are identical to GS/GM20. The machine was built in 1991, has a clutch for thread cutting, gripper with rear machining and a chip screw. A Giovanni Cucci loading magazine is attached. However, the bar guides are still there and are part of the delivery. Various tool holders, curves and collets are also included. Please, contact us for getting more information and pictures on [mail\(at\)tar-mc.com](mailto:mail(at)tar-mc.com) or www.tar-mc.com
